

THE DURADEK DIFFERENCE: BUILDER APPROVED

SUNDECKS | ROOF DECKS | BALCONIES | PATIOS | STAIRS | POOL DECKS | WALKWAYS

Duradek is a family-owned company and the original roof deck membrane provider, with over 50 years of experience as the leaders of the industry. Here's what sets us apart:

Proven Partnerships: We have been trusted by major builders such as Toll Brothers, Pulte Homes, Ryan Homes, Lennar Homes, Stanley Martin Homes, DR Horton Homes, Khov Homes, and Richmond Homes for over 30 years.

U.S. Manufacturing and Quality Control: Our products are made in the U.S. and undergo rigorous third-party quality control. All testing is up to date and available on our website.

Exclusive Training for Installers:

- We sell materials only to trained dealers, unlike competitors who sell to anyone.
- Our training is a comprehensive, two-day program that includes:
 - Hands-on experience in heat welding.
 - Learning techniques for welding seams, corners, and deck-to-wall transitions.
 - Practical application by installing Duradek on a small deck.

Warranty Protection:

- Full 15-year warranty with a 5-year appearance warranty, fully transferable and not pro-rated.
- We stand by our products and installers; if a problem arises:
 - We replace defective products.
 - We work with installers to resolve installation issues or remove them from our approved list if necessary.

Complete System Package: We provide a full package that includes membrane glues, drip edges, termination bars (L-Trim), and other color-coordinated accessories to match our vinyl.

Technical Support: Our dedicated technical support team is available to assist with any questions or issues.

Superior Material Monitoring: We monitor the materials our installers purchase and ensure they use our specially tested glues for maximum compatibility and longevity.

Reinforced Membrane Design: Our membrane features a reinforced backing on the bottom for better adhesion and flexibility with the building's movement. This design allows for hidden detail patches, reducing seams and potential leak points.

Quality Patching and Cornering: Inside corners are folded and heat-welded without cuts, eliminating potential leaks. Outside corner patches are hidden behind siding for a seamless look.

UV Resistance: Our membrane does not have a clear coat, preventing discoloration or browning from UV exposure.

By choosing Duradek, you are selecting a product with a long history of quality, extensive support, and a commitment to superior performance in the industry.
